Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-23 are rejected under 35 U.S.C. 102(e) as being anticipated by **Bieganski et al.** (U.S. Patent 6,334,127 B1).

Regarding claims 1, 10, 19-23, **Bieganski** teaches a method, system, article of manufacture for assigning an item to one or more groups of items (col. 8, lines 24-53), each of said items characterized by at least one symbolic feature, said method comprising the steps of:

a). computing a distance between corresponding symbolic feature values of said item and at least one item in each of said groups, said distance based on an overall similarity of classification of all instances for each possible value of said symbolic feature values (i.e., distance = serendipity control value) (col. 13, lines 6-17; lines 32-45);

- b). aggregating the distances between each of said features values to determine the closeness of said item and at least one item in each of said groups (col. 14, lines 32-56); and
- c). assigning said item to said group associated with a minimum distance value (col. 7, lines 9-39).

Regarding claims 2-6 and 11-15, **Bieganski** further teaches wherein said computing step employs a Value Difference Metric (VDM) technique to compute said distance between symbolic features (col. 6, lines 54-66).

Regarding claims 7-9 and 16-18, **Bieganski** further teaches wherein said items are programs (col. 16, line 29 – col. 18, line 52).

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
